

TECHNICAL RIDER

sound and lighting SYSTEM

The contracted company is responsible for the sound and lighting system to be used in the event (Box struss system or q30 for Fly PA and lighting and electrical distribution) and it must comply with technical specifications (electrical installations, sound pressure, safety, etc.)

The PA system should have uniform coverage throughout the event area without producing distortions, static noise, and grounding of the sound and light system.

For any questions or changes in rider please contact production:
booking@brunodevicq.com
